Wired Room Camera Setup

First-time camera assembly
1. Obtain two GoPro® HERO5 Black action cameras, and two SanDisk Extreme PLUS micro-SD cards with a capacity of 64GB each.
2. Open all packaging. Refer to GoPro's official instructions for camera set up here: https://tinyurl.com/WiredRoomGoProGuide

Charging
1. Remove the camera from the frame.
2. Press the side latch release button and open the side door.
3. Using the provided USB-C cable and a power block to connect to a wall outlet, charge the camera.

Filming doctor-patient simulations
1. If the camera is fully charged, remove all cables and close all doors.
2. Insert the camera into the frame and close the frame.
3. Attach the frame to the flat mount (the one that the frame was originally attached to in the packaging).
4. Put the camera mount on a tripod so the lens is at a height of 58".
5. Repeat steps 1-4 for the second camera.
6. Position the cameras as indicated in the schematic for the Wired Room: see https://tinyurl.com/WiredRoomSchematic
7. To turn on the camera, press the mode button. Once the camera has booted up, press it repeatedly to switch between modes, ensuring that you use video mode.
8. To film, press the shutter button to begin/end a recording.

Optional: Download Capture for GoPro on your iOS or Android device
1. Follow in-app instructions to sync the camera with a smart device, which allows you to live-stream from the camera, fire the shutter remotely, and to edit/delete videos in the memory of the camera.

Download GoPro Quick and GoPro Studio
1. Download the applications here: https://tinyurl.com/WiredRoomGoProSoftware
2. This is useful for quickly stringing together videos from the GoPro without removing the micro-SD card.
